## **Assemblin to conduct multi-technology installations at SEW-EURODRIVE's new facility outside Jönköping**

**Assemblin has been commissioned by Skanska to design and install electrical systems, heating, plumbing, ventilation and sprinklers at SEW-EURODRIVE's new production and office facility in Hedenstorp (outside Jönköping in southern Sweden).**

SEW-EURODRIVE, a world leader in drive equipment for industry, is investing in Sweden by building a new office building and production plant in Hedenstorp, west of Jönköping. The construction project involves a new production building of roughly 10,000 m<sup>2</sup> and a three-storey office building of slightly less than 1,500 m<sup>2</sup> intended for SEW-EURODRIVE's Swedish operations. In September, it was determined that Skanska Sweden AB would be responsible for the construction work and, on assignment from Skanska, Assemblin has now been commissioned to design and install all electrical systems, heating and sanitation, ventilation and sprinklers in the new buildings. Several Assemblin companies, as well as the wholly owned subsidiary Bankeryd Rör, will participate in the work.

Planning has commenced and the project is scheduled for completion in the second quarter of 2025 when the tenant will take possession. The project has a pronounced environmental ambition, including intelligent, energy-efficient building technology systems, with flexible lighting systems, electric car charging, security systems and a high degree of self-sufficiency through plans to connect to solar panels. The building is to be heated using district heating.

"We are proud that SEW-EURODRIVE AB has chosen to cooperate with Skanska in building its new office and production premises. We will strive to decrease the building's climate impact, including by using our own climate-improved concrete and installing solar cells," commented Hans-Fredrik Helldahl, Regional Manager at Skanska Sweden AB, in connection with the announcement of Skanska having been selected as the construction partner.

"We are very proud to have secured this assignment and look forward to designing and preparing, in close collaboration with the client and end customer, intelligent and sustainable installation solutions in SEW-EURODRIVE's new facility. Projects in which we work together and are able to apply our broad, multi-technical skills are particularly enjoyable," says Fredrik Allthin, Business Area Manager and President of Assemblin Electrical.

**About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 14.6 billion and about 7,100 dedicated employees at some 100 locations in the Nordic region. Read more at [Assemblin.com](http://Assemblin.com).
