## Assemblin installs in new multi-technical healthcare and research project

**Assemblin secures new healthcare sector installation assignment in Linköping. Assemblin will install electrical, heating, sanitation, ventilation and sprinkler systems in a new building under construction in the Garnisonen district. The order is valued at about SEK 70 million in total.**

Region Östergötland will conduct outpatient care and research in the new six-floor building. The goal is for “Building C” to meet the requirements for BREEAM’s environmental certification Excellent.

Assemblin’s client is the construction company Åhlin & Ekeroth AB, which is constructing the new building in a joint venture with Intea Garnisonen AB. The property will be owned by Intea, with Region Östergötland as the tenant. Building C will have six floors, including a basement, and the architecture will be designed to fit in with the existing surrounding buildings. The new building will be connected to the neighbouring Buildings A and B, together with them comprising the Skvadronen block. In the new premises, Region Östergötland will open an eye clinic and a speech therapy clinic and will also conduct research activities in collaboration with Linköping University.

Assemblin’s assignment will extend until the spring of 2025.

“Assemblin has extensive experience of projects involving healthcare buildings and we are familiar with the requirements that must be met. We are also proud to currently be in the planning phase for another major assignment in the healthcare segment,” says Leif Olofsson, Branch Manager for Assemblin Heating and Sanitation in Linköping.

“We are pleased to be able to contribute our expertise in another project, where we share the same commitment to sustainability. We already enjoy a beneficial partnership with Åhlin & Ekeroth, and the enjoyment we derive from collaborating on multi-technical projects within Assemblin is another advantage,” says Fredric Almgren, Production Manager at Assemblin Electrical in Linköping.

### **About Assemblin**

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 12.9 billion and about 6,700 dedicated employees at more than 100 locations in the Nordic region. Read more at [assemblin.com](https://www.assemblin.com).
