## Assemblin signs a nationwide framework agreement on preschools

**Assemblin will install ventilation, heating and sanitation systems as part of a framework agreement intended to provide Sweden's municipalities with smart bundle solutions for future-proofed preschools.**

More than 1,000 new preschools will need to be built in Sweden's municipalities over the next six years, according to a study by the Swedish Association of Local Authorities and Regions. The results of the study led to a tendering process for framework agreements in which Skanska was named one of the winning contractors. Assemblin has signed a four-year contract with Skanska, with an option of a two-year extension. The contract encompasses installations for ventilation, heating and sanitation systems for projects under the framework agreement. The first contract is now ready, and the première construction will take place in Mörsil, in Åre Municipality.

"In our assignment, we will be performing installations with separate systems for schools and kitchens. By coordinating our various technology areas, we will create optimal solutions with regard to all aspects of function and sustainability," says Mats Stark, Regional Manager of Assemblin Ventilation.

"We are working together, consciously, in a well-organised group to arrive at cost-efficient technical solutions that meet all the criteria," says Lars Svensson, Branch Manager of Assemblin's branch company Bankeryds Rör.

Skanska offers four alternatives in various sizes in its concept for turnkey preschools, with flexibility as one of the most important starting points. The ABCD preschools, as they are called, were developed by Skanska in partnership with the architectural company Sweco.

"We are extremely proud of being able to help meet the need for preschool slots in a sustainable, cost-efficient manner. In this assignment, our multidisciplinary technical competence combined with a nationwide presence will be a great advantage," says Mats Johansson, President and CEO of Assemblin.

### About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 10 billion and about 5,900 dedicated employees at more than 100 locations in the Nordic region. Read more at [assemblin.com](http://assemblin.com).
