

Assemblin

Assemblin carries out climate-smart installations in a new district in Uppsala

Assemblin has signed a new agreement with Peab and Vasakronan regarding energy installations in the “Hjärta” building in Uppsala's new district “Södra City” (Sweden).

The aim is a sustainable district with offices, housing and meeting places where cutting-edge technical solutions will contribute to Södra City becoming a role-model in sustainable urban development. The Hjärta facility comprises almost 20,000 square meters of rentable area divided into two buildings with a shared entrance and lobby with a restaurant, café, meeting rooms as well as a bicycle room. One building will be a hotel with eight floors, and the other will have six-floor offices. The entire facility will be environmentally certified according to LEED Platinum.

Assemblin contributes with technical expertise following the “Energy Balance” cooling-heat pump concept. “Energy Balance” is a concept including design, automation, monitoring and building integration.

“Energy Balance is about circulating energy locally and only supplying the energy that cannot be balanced. We do this with a reversible cooling-heat pump that uses natural refrigerant, CO₂, which provides a future-proof and climate-smart energy solution,” commented **Fredrik Strengbohm**, Head of the Cooling business at Assemblin Ventilation.

Assemblin is one of few players who master the technology and can take responsibility for delivery and function in all parts.

“We have made several installations in Sweden and Switzerland for more than five years and have proven the performance and function of the concept,” commented **Håkan Ekvall**, CEO of Assemblin Ventilation, EVP.

The first move-in will be Scandic Hotel in April 2028, followed by office tenants moving in successively.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at assemblin.se.

About Assemblin Caverion Group

Assemblin Caverion Group is the leading northern European technical service and installation provider. The Group employs about 20,000 skilled professionals in nine countries, sharing a passion for smart and sustainable solutions. We deliver installations and technical services and solutions along the full lifecycle of the built environment, supporting our customers and their increasing demand for energy-efficiency, sustainability and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the combination of Assemblin and Caverion. Our total revenue amounts to SEK 41 billion/EUR 3.6 billion. Read more at assemblincaverion.com.
