## Assemblin signs agreement with Mio Sweden regarding charging infrastructure

Assemblin Electrical through Assemblin Charge has been assigned to take over the operation and service of approximately 180 existing charging points as well as the continuous installation of new charging boxes at Mio's stores and offices around Sweden. The assignment is valid for a maximum of three years with an extension of one year at a time.

Mio is a leading Swedish retail chain for furniture and interior design with stores in more than 70 locations around Sweden. Assemblin's mission includes installation, operation and service of Mio's charging infrastructure, which includes charging points for both customer charging and the company's own vehicles. The project is an important part of Mio's commitment to strengthening customer experience and taking further steps towards a sustainable mobility solution. In total, around 180 charging points are covered, distributed across approximately 60 locations across Sweden.

"This is an assignment where we get to combine our technical expertise with a complete service delivery. We are proud that Mio has chosen Assemblin Charge as a partner in the work of creating a reliable and modern charging infrastructure that strengthens both customer experience and sustainability efforts," says **Jonas Klarén**, CEO of Assemblin Electrical, SVP.

Mio chose Assemblin Charge due to the unique overall concept for charging infrastructure that combines installation and service with an integrated and smart payment solution, creating security and efficiency for Mio and easy charging for their employees and visitors.

"For us, it was important to find a partner with broad geographical coverage and who could take a long-term, holistic approach. Assemblin has shown that they have both the expertise and the structure to deliver a stable and future-proof solution for our charging services," says **Anders Ohlsson**, Acting Head of Administration, Mio.
