Assemblin signs framework agreement with Bilmånsson in Skåne (Sweden) regarding technical security installations

Assemblin Electrical has signed a new framework agreement with Bilmånsson i Skåne AB. The agreement covers installation, service and ongoing maintenance of technical security systems at the company's facilities in Skåne.

Through the new framework agreement, Assemblin becomes a long-term and comprehensive security partner to Bilmånsson. The assignment covers a wide range of security solutions, including burglar alarms, access control systems, camera surveillance (CCTV) as well as IT integration and consolidation of existing server systems. The collaboration started in March 2026.

Assemblin was chosen as a partner due to a strong geographical presence in the region, high technical expertise in prescribed brands and a modern service organization with efficient customer support via a digital customer portal.

“This agreement is a great testament to our ability to deliver secure, scalable and modern security solutions. The combination of our technical expertise, strong local presence and efficient processes makes us a strong partner in Bilmånsson's continued development. We look forward to a long-term and secure collaboration,” commented **Jonas Klarén**, CEO of Assemblin EI, SVP.

Bilmånsson is a car dealer for Volvo, Renault, Dacia, Kia and Polestar. The company has approximately 350 employees and is located in Eslöv, Hörby, Ängelholm, Kristianstad, Ystad, Hässleholm and Lund.

“To us, it is important to have a partner who can take overall responsibility for our security systems and contribute with both technical expertise and proactive service. Assemblin offers a modern and transparent delivery model that gives us security in everyday life and the opportunity to grow further with a scalable and future-proof security solution. It also feels safe that their service organisation will continue operating after the installation work is completed”, says **Niklas Fernholm**, IT Manager, Bilmånsson i Skåne AB.
