

Assemblin

Assemblin has secured a multi-technical project with focus on recycling

Assemblin has signed an agreement with NCC Sverige AB in connection with the renovation of the S-building at the Mälardalen University in Västerås. The assignment includes installations for electricity, heating, sanitation, ventilation, sprinklers and automation with a total order value of approximately SEK 50 million. The project, with Hemsö as the developer, is being carried out with a strong focus on sustainability and recycling.

A large portion of the materials and products used in the building will be recycled, including windows, doors, dry walls, carpets, as well as parts of the installation components. The existing light fixtures will be upgraded to more energy-efficient LED models in collaboration with Fagerhult. When new materials are required, those with the lowest possible environmental impact are chosen. The goal is to, as one of the first projects in Sweden, be certified as "Miljöbyggnad Ombyggnad 4.0 Gold".

"We are happy to be part of this exciting project, which challenges us to explore recycling opportunities together. The project can provide us, and the entire industry, with valuable insights for the future," says Jonas Klarén, CEO of Assemblin EI, SVP.

The building covers approximately 6,000 square meters on three floors including a basement. The renovation will provide modern administrative premises for the Mälardalen University. The project combines innovative and sustainable solutions with current requirements for indoor climate and energy efficiency. The project started in the spring of 2025 and is expected to be completed in September 2026.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden and Norway. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration in some 100 locations and are supported by a strong organisation. Read more at assemblin.se.

About Assemblin Caverion Group

Assemblin Caverion Group is the leading northern European technical service and installation provider. The Group employs about 20,000 skilled professionals in nine countries, sharing a passion for smart and sustainable solutions. We deliver installations and technical services and solutions along the full lifecycle of the built environment, supporting our customers and their increasing demand for energy-efficiency, sustainability and automation for buildings, infrastructure and industrial sites. Assemblin Caverion Group was formed in April 2024 through the combination of Assemblin and Caverion. Our total revenue amounts to SEK 41 billion/EUR 3.6 billion. Read more at assemblin.se.
