Assemblin wins a multi-technical installation assignment in a new R&D facility in Lund

Assemblin has been contracted by Skanska to design and install electrical, heating, water, cooling and gas technology in a new R&D facility in Lund (the Höjdpunkten 5 property). The value of the installation assignment is estimated at SEK 85 million.

On behalf of property company Vectura, Skanska is to build a new facility of approximately 24,000 m² with offices, a laboratory and a test environment. Groundwork has begun and the buildings are scheduled for completion late 2025.

Skanska has contracted Assemblin to assume responsibility for the electrical and heating & sanitation technology at the facility, including the design and installation of electrical, power and lighting systems, as well as heating, water, cooling and gas systems. The planning is scheduled to be completed in April 2024, after which the installation work will commence. The total order value is estimated to SEK 85 million.

“Assemblin has extensive experience of project and service assignments in security-classed buildings. In this type of project, it is crucial that we have competent and reliable personnel, but also that we maintain appropriate procedures and processes, as well as applying a secure and stable systems platform,” says Fredrik Allthin, President and Business Area Manager at Assemblin Electrical.

“We are very pleased with this assignment, with high demands on safety, quality and redundancy. Distinctive for the project are advanced gas systems, which require special expertise. This will be a key installation project in southern Sweden, and we are looking forward to contributing to this exciting project in close cooperation with our clients and other parties involved”, says Andreas Aristiadis, President and Business Area Manager at Assemblin H&S.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 14.6 billion and about 7,100 dedicated employees at some 100 locations in the Nordic region. Read more at [Assemblin.com](https://www.assemblin.com).
