Assemblin to design ventilation and sprinkler solutions in connection with the remodelling of Ryhov Hospital in Jönköping

Assemblin has been commissioned by NCC Building Sweden to design and install ventilation and sprinkler technology in connection with the completion of the Accident and Emergency facility at Ryhov Hospital in Jönköping. The order for the first sub-project of the installation assignment is estimated at about SEK 30 million.

The central complex at the Ryhov County Hospital was originally built in the 1980s and is now to be upgraded to be able to meet new needs in healthcare and society. The current Accident and Emergency department is to be rebuilt and expanded, and as a preparation, other departments are now to be modernized to free up space for future work with the Accident and Emergency department. In this sub-project, Assemblin has been commissioned by NCC to assume responsibility for designing, planning and installing ventilation and sprinkler systems. The sub-project will be run as a collaborative project.

“Healthcare buildings are often complex and, in this case, rigorous demands are imposed in terms of quality and usability. Assemblin has extensive experience of such assignments and is very pleased to be participating in this exciting project. In close collaboration with the other parties involved, we look forward to being able to contribute by designing intelligent and sustainable ventilation and sprinkler solutions for the benefit of the catchment area’s residents,” says Håkan Ekvall, Business Area Manager and President of Assemblin Ventilation.

The assignment includes three sub-projects with the ultimate objective of the new Accident and Emergency facility being completed by the end of 2028. Sub-project 1 is now entering detailed design and production and is scheduled for completion in the first quarter of 2026.

About Assemblin

Assemblin is an end-to-end installation and service partner with operations in Sweden, Norway and Finland. We design, install and maintain technical systems and solutions for air, water and energy. Our vision is to create smart and sustainable installations that make buildings work and people feel comfortable. We make this possible through close local collaboration and are supported by a strong organisation. We have annual sales of SEK 14.6 billion and about 7,100 dedicated employees at some 100 locations in the Nordic region. Read more at [Assemblin.com](https://www.assemblin.com).
